Restriction /Election

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1,15-18, 23-31,46-49,60-66,74-76, and 93, 98-101, are drawn to a process of producing a carboxylic acid salt, classified in class 562, subclass 538.
- II. Claims 2-14, 19-22,32-45, 50-59, 67-73, 78-81, 94-97, and 140-168 are drawn to a dehydrogenating catalyst and its support system, classified in class 502, subclass 102.
- III. Claims 77, 82-89, and 90-92 are drawn to a process of producing a salt of disodium iminodiacetic acid, classified in class 562, subclass 544.
- IV. Claims 102-126 are drawn to a catalyst composition ,classified in class 502, subclass 300.
- V. Claims 127-138 are drawn to a process for making an oxidation catalyst, classified in class 502, subclass 104.
- VI. Claim 139 is drawn to a process for making N-(phosphonomethyl) glycine , classified in class 562, subclass 553.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 09/832,541

Art Unit: 1625

Inventions Group I and Group V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are Group I and Group IV. The invention of Group I is related to the process of producing a carboxylic acid, whereas the invention of Group IV involves the catalyst composition. The invention of Group IV can be employed in a different process; for example, Yamachika et al (U.S. 4,500,721) discloses a process for producing benzaldehydes by catalytic reduction of benzonitriles using a catalyst system.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group IV, restriction for examination purposes as indicated is proper.

Furthermore, these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Taylor Victor Oh whose telephone number is 703-305-0809. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alan Rotman can be reached on 703-308-4698. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-2742 for regular communications and 703-305-7401 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
